

CODE OF GOOD PRACTICE

Approved October 29, 2015

The Virginia Biosolids Council's "Code of Good Practice" establishes guidelines for responsibly producing and managing exceptional quality Class A and high quality Class B Biosolids for beneficial use and recycling in the Commonwealth of Virginia. The Virginia Biosolids Council and its members have established measurable performance objectives to support the following goals:

- continual compliance with all applicable regulations for the safe production, transportation, staging and beneficial use of biosolids;
- eliminate instances of adverse social impact associated with the production, transportation, staging and management and beneficial use of biosolids on agricultural and forest lands of Virginia; and
- effective communication to the public, farmers and government officials regarding the value and benefits of biosolids recycling in the Commonwealth of Virginia.

Specifically, the Council urges its members to conduct their operations using the following guidance:

Product Quality:

The generation and management of biosolids for beneficial uses will comply with all regulatory requirements. The Council and its members support sustainable best management practices to minimize odors and ensure quality products that minimize adverse social impacts and protect the environment. The Council and its members share technologies and processes demonstrated to improve product quality and support sustainability.

Communications:

The information provided to local and state officials, farmers and the public will be clear, accurate and timely. The Council encourages members to proactively engage and communicate with communities, the public, interested stakeholders and government officials.

Continual Improvement:

The Council promotes continual improvement in the area of product quality, communications and best management practices. Members routinely review research, case studies and regulations to identify opportunities and to improve performance and quality. The Council provides resources and guidance to members to support sustainable best management practices in the production, staging, transportation and beneficial uses of biosolids.

Safety:

The Council and its members are committed to protecting the health and safety of its employees and the public. The Council promotes the development and implementation of spill prevention and incident and emergency response plans.

This acknowledges that

affirmed its support of the Virginia Biosolids Council's voluntary Code of Good Practice on October 29, 2015.

James C. M. Grandstaff, President
Virginia Biosolids Council
